Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Treatment of Corrosion in Central Heating Systems This paper is published by the Bureau of Mines as a contribution to the literature on the corrosion of iron and steel and as a guide to engineers in the design of heating systems. Whether hot water or steam is used as the medium for conveying heat to the consumer, a heavy toll in upkeep must be faced sooner or later if the corrosion of piping is not taken into account in the design of the plant. The main source of corrosion has been traced to dissolved gases brought into the heating system either with the feed water for the boiler or through leaks in return lines under a pressure below that of the atmosphere.
