SPH MESHLESS METHODS FOR INTERNAL AERODYNAMIC COMBUSTION ENGINE

SPH Meshless methods for
internal aerodynamic
combustion engine

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Smoothed Particle Hydrodynamics (SPH) is a fully gridless Lagrangian method, invented in 1977 for astrophysical simulations. Due to its simplicity and robustness, this numerical method has been extended to solid mechanics for rapid dynamic phenomena and more recently to complex fluid mechanics problems such as dam breaking and wave flumes. However, the literature is quite scarce regarding SPH "academic" for flow validation and turbulent flows modelling. The goal of this work is...
