

Environmental Dynamics of Pesticides [Environmental Science Research Series, Vol. 6]

By Haque, Rizwanul & V.H. Freed, eds.

Plenum Press, New York, 1975. Hardcover. Condition: NEW. vii + 387 p., numerous figures and tables. Because pesticides have entered the biosphere as persistent toxic chemicals, this volume explores the concept of pesticide chemodynamics, examining the behavior of chemicals in air, water, soil, and the biota. Topics discussed include modeling in the environment, photochemical behavior, adsorption, leaching and breakdown, vapor loss, interaction with biological macromolecules, and detoxication of pesticides by the biota.

Reviews

This written publication is wonderful. It really is loaded with knowledge and wisdom You will not really feel monotony at at any time of your time (that's what catalogues are for relating to if you ask me).

-- Desmond Becker

Absolutely essential go through publication. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of the time (that's what catalogues are for regarding if you ask me).

-- Ambrose Thompson II
