

The Math Behind.: Discover the Mathematics of Everyday Events

By Colin Beveridge

Firefly Books. Paperback. Condition: New. 192 pages. An entertaining illustrated reference to the role of mathematics in everyday life. The Math Behind. . . is a fascinating compilation of everyday events analyzed for their probability of occurring and how those odds are determined using mathematical equations and science. The book examines everything from how predictive text works to why buses come in threes and the likelihood that toast will land butter side down. Accessible and clear explanations, without dumbing down the science, and photographs and diagrams illustrate concepts and aid understanding. There are six chapters. Here are some of the questions covered: The human condition: Why hipsters look the same What are the chances of you even being born What makes certain songs so catchy Why we find some people more attractive than others Sports and games: The perfect 9-ball break in pool How to play the lottery How to take a free kick The secret behind Michael Jordans air time Why the house always wins From A to B: The causeless traffic jam Just how likely is a plane to crash How long would it take a chicken to cross a road Is it possible to have a car...

Reviews

This book is great. It is written in simple words and not difficult to understand. I discovered this pdf from my dad and I suggested this ebook to find out.
-- Prof. Webster Barrows

This ebook is fantastic. We have read and I also am confident that I am going to go to read through again yet again in the future. I am easily can get a pleasure of reading a published ebook.
