

Thermal Management of Electronic Systems

Filesize: 5.5 MB

Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of EUROTHERM Seminar 29, 14-16 June 1993, Delft, The Netherlands | Proceedings of EUROTHERM Seminar 29, 14--16 June 1993, Delft, the Netherlands | The Eurotherm Committee has chosen Thermal Management of Electronic Systems as the subject of its 29th Seminar, at Delft University of Technology, the Netherlands, 14-16 June 1993. This volume constitutes the proceedings of the Seminar. Thermal Management is but one of the several critical topics in the design of electronic systems. However, as a result of the combined effects of increasing heat fluxes, miniaturisation and the striving for zero defects, preferably in less time and at a lower cost than before, thermal management has become an increasingly tough challenge. Therefore, it is being increasingly recognised that cooling requirements could eventually hamper the technical progress in miniaturisation. It might be argued that we are on the verge of a revolution in thermal management techniques. Previously, a packaging engineer had no way of predicting the temperatures of critical electronic parts with the required accuracy. He or she had to rely on full-scale experiments, doubtful design rules, or worst-case estimates. This situation is going to be changed in the foreseeable future. User-friendly software tools, the acquisition and integrity of input and output data, the badly needed training measures, the introduction into a concurrent engineering environment: all these items will exert a heavy toll on the flexibility of the electronics industries. Fortunately, this situation is being realised at the appropriate management levels, and the interest in this seminar and the pre-conference tutorials testifies to this assertion. | Preface. 1: Invited Lectures; C.J.M. Lasance, A. Bar-Cohen, S. Witzman. 2: Numerical and Experimental Analysis of Systems; S. Drake, M. White, A. Felthouse, C. Ganderton, S. Glanfield, J.D. Parry, D.G. Tatchell, H. Bruneel,...
