There are an infinite number of ways in which we may conceive one quantity y to depend upon, be calculable from, or, in technical mathematical language, be a function of, another quantity x . Thus we may have, for example, $y = Zx$, $y = Ax + B$, $y = az + bz + c$, and so on. For convenience x is called the independent variable, and y the dependent variable; because we imagine that any value we please is given to x , and the corresponding value of y derived from it by means of the functional relation. All the other symbols of quantity that occur in the above equations, such as 3 , 17 , a , b , c , $VOL.$, I , T , 2 , and c , are supposed to remain fixed, and are therefore called constants. Here we attach meanings to the words variable and constant more in accordance with their use in popular language than...
