This course has been rendered requisite, not only on account of the progress of Science generally during the last three decades, but also and more especially because of the altered position in which the study of Physical Science now stands in reference to ordinary education. Thirty years ago, systematic instruction in this subject was hardly to be met with in England outside the walls of a limited number of universities, colleges, and medical schools. As a matter of every-day education requisite for all classes, and not merely for a comparatively small number of students preparing for special walks in life, Physical Science had little or no existence; and when scientific experiments were shown in public, and popular lectures on Science delivered, the matter was treated more from the point of view of the conjurer and showman or caterer for amusement, than from that of the teacher of a branch of knowledge as valuable as a means of developing the faculties as any other kind of mental training known.
