

Burning for the Control of Aphids on Alfalfa in the Antelope Valley of California (Classic Reprint) (Paperback)

By R a Blanchard

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Burning for the Control of Aphids on Alfalfa in the Antelope Valley of California Some of the characteristics found to be of particular advantage in the construction of a field burner are the following: The burner should be drawn by a tractor with power take-off. The machine should be supported on a 4-wheel chassis with fairly short turning radius and with the rear axle placed at the front end of the hood in line with the nozzles of the burner gang. The dead weight of the machine should be kept as low as possible. Arrangements for a rapid means of refueling are essential. The use of fuel from the original container is feasible when quick detachable pipe connections are provided. Burners should be spaced to provide complete coverage. One row of burners is preferable. Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
