By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Original publisher: Champaign, IL: US Army Corps of Engineers, Construction Engineering Research Laboratories ; Springfield, VA: National Technical Information Service, distributor, 1998 OCLC Number: ocm41325017 Subject: Conservation of natural resources -- United States -- Management. Excerpt: . . . 14 USACERL TR-98 79 3. Physiognomic Type: Palustrine and Terrestrial Herbaceous Wetlands (Allard 1990). Environmental Factors. 1. Topographic Position: Overwash communities occur in moisture-rich areas such as interdunal swales, sand flats, and sheltered depressions (Stalter 1993b). 2. Hydrology: Hydrology grades from palustrine in areas where the water table is less than 50 centimeters (cm) below the surface (these areas flood in heavy rains) to terrestrial in areas where the water table is between 50 and 150 cm below the surface (these areas rarely flood; Stalter and Odum 1993). Although palustrine areas are saturated with fresh water, overwash communities in general are susceptible to salt spray and salt water overwash during storms (Martin 1991a, b). 3. Disturbance Regime: In addition to salt water and sand overwash, burial of plants by wind blown sand affects this community (...)

Reviews

Most of these publication is the perfect ebook accessible. It is amongst the most awesome publication i have got read through. You wont truly feel monotony at whenever you want of the time (that's what catalogs are for regarding in the event you request me).

-- Prof. Edgar Kshlerin

It is easy in study safer to comprehend. It can be writter in basic phrases and never confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Emmitt Harber
