Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Brand New Book ***** Print on Demand *****.Excerpt from General Science The question of what science shall be taught in the first year of the regular high school, or in the eighth or ninth years of the Junior High School, is becoming one of steadily increasing importance. The logical course for this period of the child s school life seems to be a general course in those elements of science which will form a foundation for the sciences which usually come later in the high school courses of study, and which will give the best training to those who may withdraw from school at the end of the ninth year. For a number of years physical geography was the science commonly taught in the ninth year. Teachers of this subject found that in order to do their best work, it was necessary to give a considerable portion of their time to teaching the elements of related sciences such as physics, chemistry, and botany. The same thing was true of the teachers of the biological sciences. This fact furnishes an excellent argument for the substitution of a course in general science for the sciences which were formerly taught in the first year of our high schools. First year science is intended for immature minds. It must be presented and illustrated in such a way that the pupil will not be confused with terms which are too technical nor with treatments of topics which are too advanced for him.
