Forgotten Books. Paperback. Condition: New. 324 pages. Dimensions: 9.0in. x 6.0in. x 0.7in.1. In order to explain the transmission of light from the sun and stars to the earth, Sir Isaac Newton supposed that the rays of light consisted of substance discharged from the luminous centre, as a projectile discharged from a gun. This emission theory did not require that there should be any medium in the intervening space, for the purpose of such transmission of light. But when it came to an explanation of the attraction exerted by one body of matter on another through intervening space, he found it necessary to assume the existence of a subtle fluid or medium filling all space to which the name of Ether was applied. The undulatory theory of light subsequently advanced by Huyghens, and developed by Young, Euler, Fresnel, and others, which explains the transmission of light from the sun and stars, through space, by waves passing through Ether, has so satisfactorily accounted for many optical phenomena, not otherwise ex-Table of Contents PART I1; FIRST PRINCIPLES; General views of the luminiferous Ether-The Ultimate Substance-The constitution of matter in its three states- Gases, liquids and solids-Different kinds of wave motion as affected by the medium of transmission-Water waves- General theory of wave motion-Composition of wave motion-Stationary water waves-Stationary light waves- Motion in the polarized ray-Heart throbs of the Universe -Vortex centers, -Particles of successive Orders-Repulsion of particles-Light as an elastic hoop-Creation of particles of tho First Order, by rotation of a polarized ray-Bal-mers Formula a key to the structure of the atom and of the ether; PART II105; THE PAN CYCLE HYPOTHESIS Ixvisibus Composition 3-jght Waves, the Wajsp and Woof of the Ether Structure and of All Thincs Material; The extent of the physical Universe-The two theories- Convincing evidence of an average...
