

Dynamique de la chromatine en réponse aux dommages de l'ADN: Suivi des variants de l'histone H3 après irradiation aux UVC dans les cellules humaines (Paperback)

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Ally Reichel)

DYNAMIQUE DE LA CHROMATINE EN RÉPONSE AUX DOMMAGES DE L'ADN: SUIVI DES VARIANTS DE L'HISTONE H3 APRÈS IRRADIATION AUX UVC DANS LES CELLULES HUMAINES (PAPERBACK)

Editions universitaires européennes EUE, 2016. Paperback. Condition: New. Language: French . Brand New Book. Dans les cellules eucaryotes, la réponse aux dommages de l'ADN s'accompagne d'une réorganisation de la chromatine. Cette structure, associant l'ADN aux protéines histones, est porteuse de l'information épigénétique, qui définit l'identité cellulaire. Cependant, nos connaissances concernant les mécanismes impliqués dans la réorganisation de la chromatine dont l'intégrité structurale et fonctionnelle a été menacée par un stress génotoxique sont encore limitées. En combinant une technologie innovante de suivi spécifique des histones parentales ou nouvellement synthétisées à des techniques de pointe d'induction de dommages locaux dans l'ADN, j'ai ainsi mis en évidence que des nouveaux variants H3.3 sont incorporés localement dans la chromatine lésée aux UVC, ce qui faciliterait la reprise de la transcription après réparation des dommages. Quant aux histones H3 parentales, elles sont initialement redistribuées autour des sites de lésions avant de revenir à ces sites de manière couplée à la réparation de l'ADN. Ce retour d'histones préexistantes contribuerait au maintien de l'intégrité de l'information épigénétique véhiculée par la chromatine avant stress génotoxique.
