

Nutrition in the Hills of Bangladesh: A comparative study

By Das, Asish

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Nutritional Status of the Under Five Children in the Chittagong Hill Tracts: A Comparative study of the Bengali and Indigenous Communities | Objectives: Estimation of the prevalence of underweight in the Bengali and Indigenous communities of under five children in the Chittagong Hill Tracts in Bangladesh and attempt to find its causal relation with feeding practice and household food security. Methodology: Descriptive QUANQual type of Crosssectional Comparison study. Collected data on 432 under five children and their families, half from Indigenous and remaining half from the Settler Bengali communities were analysed and compared to meet the objectives of the study. Results: No significant differences ($p < 0.05$) were found in terms of prevalence of underweight in both communities. Direct and statistically significant association was found between mothers weight, duration of exclusive breast feeding and the nutritional status of the children only in the Indigenous group (P | Format: Paperback | Language/Sprache: english | 118 gr | 72 pp.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Otis Wisoky

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).

-- Dr. Everett Dicki DDS
