DETECTING MALINGERED MEMORY IMPAIRMENT IN A JAPANESE POPULATION

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Utilization of the Rey-15 and Wechsler Digit Span | Over 60% of individuals who pursue personal injury litigation malingering or show poor test taking motivation during formal assessment. Adequate detection of test taking motivation and malingered performance, especially among persons claiming memory impairment following mild head trauma, is an important topic for investigation. Two measures that are frequently used for this purpose in North America are the Rey 15-Item Memory Test (Rey-15)...
