

Optimization of Mechanical Design (2nd Edition universities teaching mechanical engineering series)

Filesize: 9.73 MB

Reviews

Undoubtedly, this is the greatest job by any author. It is actually filled with wisdom and knowledge I am quickly could get a pleasure of reading a written book.

(Kade Ankunding)

OPTIMIZATION OF MECHANICAL DESIGN (2ND EDITION UNIVERSITIES TEACHING MECHANICAL ENGINEERING SERIES)

DOWNLOAD

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 217 Publisher: Zhejiang University Pub. Date :2010-03-01 version 2. This book systematically introduces the basic principles of mechanical design and optimization of commonly used optimization methods. The book is 10 chapters. Chapter to Chapter 3 presents the basic concepts of mechanical design. mathematical models and a number of theoretical basis; Chapter IV to VI describes a single target. continuous variables used to optimize the design principle of the method. and algorithm block diagram of the iterative process; seventh. eighth chapters introduce multi-objective function and design of discrete variable optimization methods; the ninth. tenth chapter to further elaborate mathematical modeling and optimization solution in a number of issues. through the example to illustrate the application of mechanical optimization method to optimize the design process. End of the book with exercises and used to optimize the design process. for readers to practice and Hands operations. The book seeks to write simple and focus on the basic concepts and practical applications. Book for mechanical engineering colleges. nearly machine specialty materials and in mechanical engineering design and other technical staff reference. Contents: Introduction Chapter I Chapter II of the basic elements of mechanical design optimization mathematical model of 2-1 and 2-2 design variable constraints 2-3 2-4 objective function optimization. the mathematical model to optimize the design chapter question the basis of 3-1 a number of theoretical optimal design of the geometric meaning of an objective function of the equivalent surface (line) Second. the constraints and unconstrained optimal solution optimal solution three local optima and the global optimal solution 3-2 unconstrained objective function of the existence of conditions of an extreme point. the function of the extreme and the extreme point two. there...
