

## Studies on the Irrigation of Citrus Groves: March 1922 (Classic Reprint) (Paperback)

By Edward Ellis Thomas

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Studies on the Irrigation of Citrus Groves: March 1922 There are many complex and as yet unsolved problems connected with irrigation in semiarid regions. As will be shown later, the method employed in the application of Water may be the deciding factor between success and failure of crops. In order to obtain the best results, a careful study of the water requirements of the crops grown and of the best method of applying the water should be made. Similar soils under different atmospheric conditions may require variations in the irrigation practice. The rates of transpiration by the crop and evaporation from the surface of the soil are probably much greater in the interior sections of California than in the coastal regions, because the temperature and aridity of the former are higher than of the latter. These factors. May determine, in consider able measure, the times of application and the amount of water needed. Wide differences occur in the soil conditions in different sections. The method of irrigation best suited to heavy soils may differ from that Of light Sandy soils, for the...
