The reasons for this development are varied. The most important factor is doubtless the internationalisation of companies. Acting on international markets offers on the one hand numerous chances for an enterprise but on the other hand it also holds an additional risk potential concerning losses. This negative aspect is mainly caused by a lack of information regarding political risk and exchange rate risk. Risk management is also necessary referring to change in interest rates. It is possible to limit, control and organize the interest rate risk as well as other risks of the company. As the financial outcome of a company gains importance risk management concerning interest rates and exchange rates is thus essential. To face these risks and other problems that derive of variations in stock markets, interest markets or exchange markets derivative instruments play a significant...
