This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, after the way I believe.

Whether the Egyptians, the Hebrews, Chaldeans, and other Semitic nations, which had arrived at a certain degree of musical culture, noted their music is not known; it may be presumed that they did, but up to the present nothing has been discovered of the nature of a musical semeiography. It cannot be said that these nations were not yet sufficiently advanced to be able to invent a means of writing down the various sounds of voices and instruments: the fact remains that, as far as we know at present, the Greeks were the only ancient European nation that did so, and they made use of letters of the alphabet for this purpose, as did the Hindus before them, and the Western Europeans after them; the Persians Other used numbers, and a kind of stave of nine lines, between which the numbers were placed, while the Chinese used special signs for their pentatonic scale. The history of our present notation begins with that of the Greeks, who arranged their alphabet in groups of three letters to each tone, thus showing the semitones and quarter-tones. The knowledge of this arrangement passed away until rediscovered in the nineteenth century by the labours of Bellermann, Fortlage, and others,...
