RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1853 edition. Excerpt: . . . of lipyl, which may be separated in the form of glycerine. Lehmann regards them as haloid salts, formed by the combination of a haloid base with an organic acid, and he places together the oxides of ethyl, methyl, and lipyl, as belonging to the same series of compounds. They are also analogous in composition to what Gmelin calls ethers of the third class, and acetate of the oxide of methyl, one of these bears a certain degree of analogy in its chemical constitution to fats and oils. Again, spermaceti is the cetylate of the oxide of cetyl, and the hydrated oxide of cetyl is considered by chemists to be closely allied to the alcohols, in fact a species of alcohol. It is not unworthy of notice that, nearly a century ago, cod liver oil was recognised as a remedy of no mean value, though its efficacy in consumption continued unknown; also that suet dissolved in milk was known as a remedial article of diet in consumption in the time of Dr. Young. Yet it is strange that two such Dr. Winkler states that he has lately found that cod liver oil differs in composition from all other oils hitherto used in medicine in this respect, that when saponified with potash it does not yield glycerine, but oxide of propyle, a new body which exists in combination with the oleic and margaric acids, taking the place of the oxide of lipyl in other oils and...
