A superior quality book and also the font employed was fascinating to learn. I could possibly comprehend almost everything using this created e publication. You wont sense monotony at at any time of your respective time (that's what catalogs are for about should you ask me).

BIFURCATIONS IN FLOW PATTERNS

Book Condition: New. Publisher/Verlag: Springer, Berlin | Some Applications of the Qualitative Theory of Differential Equations in Fluid Dynamics | The main idea of the present study is to demonstrate that the qualitative theory of differential equations, when applied to problems in fluid-and gasdynamics, will contribute to the understanding of qualitative aspects of fluid flows, in particular those concerned with geometrical properties of flow fields such as shape and stability of its streamline patterns. It is obvious that insight into the qualitative structure of flow fields is of great importance and appears as an ultimate aim of flow research. Qualitative insight fashions our knowledge and serves as a good guide for further quantitative investigations. Moreover, qualitative information can become very useful, especially when it is applied in close correspondence with numerical methods, in order to interpret and value numerical results. A qualitative analysis may be crucial for the investigation of the flow in the neighbourhood of singularities where a numerical method is not reliable anymore due to discretisation errors being unacceptable. Up till now, familiar research methods -frequently based on rigorous analyses, careful numerical procedures and sophisticated experimental techniques -have increased considerably our qualitative knowledge of flows, albeit that the information is often obtained indirectly by a process of a careful but cumbersome examination of quantitative data. In the past decade, new methods are under development that yield the qualitative information more directly. These methods, make use of the knowledge available in the qualitative theory of differential equations and in the theory of bifurcations. | I Some Elements Of The Qualitative Theory Of Differential Equations.- 1. Phase space representation of a dynamical system.- 2. Phase portraits near singular points.- 3. Topological structure of phase portraits, structural stability, bifurcation.- 3.1. Topological structure...
