

## Report of the Defense Science Board Task Force on Unexploded Ordnance (Paperback)

Filesize: 1.2 MB

### **Reviews**

*This publication is wonderful. It can be rally fascinating throug reading period of time. You are going to like the way the writer create this publication.*

*(Mrs. Piper Jacobi)*

**REPORT OF THE DEFENSE SCIENCE BOARD TASK FORCE ON UNEXPLODED ORDNANCE (PAPERBACK)****DOWNLOAD**

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The Defense Science Board Task Force on Unexploded Ordnance, UXO, met from September 2002 to May 2003. The Task Force's charter contained two principal questions: (1) can advanced technology help reduce the very high cost of UXO cleanup at former and current test and training sites and (2) can advanced technology help minimize the environmental impact of future live-fire munitions training? The Task Force's answer to both these questions is a qualified yes. Today's UXO cleanup problem is massive in scale with some 10 million acres of land involved. Estimated cleanup costs are uncertain but are clearly tens of billions of dollars. This cost is driven by the digging of holes in which no UXOs are present. The instruments used to detect UXOs (generally located underground) produce many false alarms, -i.e., detections from scrap metal or other foreign or natural objects-, for every detection of a real unexploded munition found. Because each of these false alarms could potentially be a UXO, a careful excavation is required, leading to very high costs. The Task Force believes that modern technology can substantially reduce such false alarms leading to a dramatic reduction in overall cleanup cost. Some substantial changes in cleanup management structure are needed to foster the deployment of such technology. Much of the aforementioned 10 million acres is free of UXOs and this land could be returned to public use relatively quickly. The Task Force recommends an aggressive five-year program to accomplish this release. The Task Force concluded that technology can also help with future environmental problems associated with live-fire testing. The DoD uses over two million rounds of high explosive munitions per year for training purposes. Thus...
