Estudio del Proceso de Anodizado en Aluminio 3003 y 6063

By Leonardo Eladio Vergara Guillen

EAE Feb 2012, 2012. Taschenbuch. Condition: Neu. Neuware - Este estudio pretende determinar en qué medida las variables del proceso afectan el anodizado del aluminio Al3003 y Al6063. Para ello, se realizaron estudios de la microdureza, rugosidad, espesor de capa y porosidad de la superficie anodizada, utilizando la metodología de análisis experimental multifactorial y diseño robusto. Se establecieron los siguientes rangos de las variables: temperatura [15°C, 25°C], tiempo [30min; 60min], concentración de electrolito [1,2M; 2M], densidad de corriente [1Amp/dm²; 3Amp/dm²], aluminio [3003,6063], y como variable de ruido, la deformación plástica [0%,10%,20%,30%]. A los resultados se les realizó un análisis de varianza (ANOVA), para determinar los factores significativos, la probabilidad de que los efectos se deban a otros factores de ruido, y la robustez de los efectos independientemente de la variabilidad de los factores del proceso. 136 pp. Spanisch.

Reviews

This sort of publication is everything and made me seeking forward and much more. Better then never, though i am quite late in start reading this one. I am easily could possibly get a delight of reading through a created pdf.

-- **Quinton Balistreri**

A really amazing ebook with lucid and perfect answers. I am quite late in start reading this one, but better then never. You are going to like the way the blogger write this pdf.
