

Laser Passivement Q-Declenche

By Jérôme Maria

Editions Universitaires Europeennes. Paperback. Condition: New. 192 pages. Dimensions: 8.7in. x 5.9in. x 0.4in. Les lasers impulsionnels, en raison de leurs propriétés intrinsèques (faible durée, fortes puissances crêtes), ont de nombreuses applications dans des domaines aussi variés que l'industrie, la médecine ou la métrologie. Fusionner ces propriétés avec les avantages des lasers entièrement fibres (lumière confinée, grande longueur d'interaction, pas d'alignement) est donc un enjeu technologique et scientifique très prometteur. Ce manuscrit de thèse traite de la dynamique des lasers auto-impulsionnels afin d'optimiser un laser entièrement fibre passivement Q-déclenché par absorbant saturable. Notre intérêt se porte sur l'ytterbium (Yb3) comme milieu amplificateur et le chrome (Cr4) comme absorbant saturable (AS). Une première étude originale a permis de déterminer le temps de vie du Cr4 à température ambiante dans les fibres en silice inférieure à 1 ns, durée bien plus courte que celle mesurée dans des cristaux de référence. Grâce à cet AS peu efficace (court) qui stabilise les auto-impulsions chaotiques engendrées par l'Yb3, nous avons alors réalisé le premier laser auto-impulsionnel stable entièrement fibre Yb3:Cr4 avec des durées de sub-nanosecondes pour des puissances crêtes de 4W. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

This publication is definitely worth buying. It can be loaded with wisdom and knowledge I am easily could possibly get a satisfaction of looking at a composed publication.

-- **Rhiannon Steuber**

Very helpful to all type of individuals. It really is really interesting through looking at time. Its been designed in an extremely basic way which is just soon after I finished reading this pdf through which basically modified me, change the way I believe.
