## The Morphology of the Podocarpaceae: A Dissertation (Classic Reprint) (Paperback)

By Mary Sophie Young

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Morphology of the Podocarpaceae: A Dissertation Thompson (20) lays a good deal of stress on the megaspore membrane as a primitive character. It is entirely eliminated in Taxineae, but characterizes all the members of the other family except Podocarpus itself. As the ovulate structures of the type genus are by far the most specialized of the family, this is not surprising. Miss Robertson thought the megaspore membrane and spongy tissue were in some way correlated with the presence of winged pollen, but their occurrence in Saxegothaea with its wingless microspores breaks down this supposition. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
